

ALTIN BRAHMANI

Full-Stack Developer

Haute-Savoie, France · altin_rrahmani@live.com · linkedin.com/in/altin-r-3a547a228 · github.com/DevKosov

Open to full-time roles, remote or in Haute-Savoie

PROFILE

Full-stack developer with 4 years of experience, mostly with Laravel and Vue.js. I also take care of the database, the servers and the deploy pipeline. I split my week between Diabolocom, a contact-center SaaS used by companies like SFR and MAIF, and LYNKX, an outdoor-safety IoT startup where I'm the only developer.

EXPERIENCE

Full-Stack Developer · Diabolocom

Oct 2025 – Present

Quality Monitoring product of a cloud contact-center suite · 4 days a week

- › Led a ClickHouse proof of concept for the statistics pages, which had slowed down as big clients (SFR, OHM Énergie, MAIF) added more data. Designed how the data is stored and queried, and brought key queries from about 5 s down to 200-300 ms.
- › Moving the interface from Laravel Nova to a custom Vue.js app, because Nova limits how far the product can be customized. Helped plan the front-end architecture before the switch.
- › Built analytics dashboards and reworked parts of the Quality Monitoring interface.

Laravel · Laravel Nova · Vue.js · ClickHouse · MySQL

Full-Stack Developer (work-study, then hired) · LYNKX

Aug 2022 – Present

Outdoor-safety IoT: the LYNKX+ alert beacon and the BIVOUAK app · Only developer, 1 day a week since Oct 2025

- › Pitched and led a full rewrite of the old plain-PHP app in Laravel and Laravel Nova. The new version is faster and a lot easier to maintain.
- › Handle everything from the code to the servers: CI/CD with GitHub Actions, Docker, hosting on Scaleway.
- › Wrote a WordPress plugin that connects the LYNKX platform to the company's WooCommerce shop.
- › Worked on the IoT side over the LoRa network. Helped design the payload the beacons send to IoT providers, and brought the device data into the web platform.

Laravel · Laravel Nova · PHP · MySQL · Docker · GitHub Actions · WordPress · LoRa

Web Developer (internship) · MVP

2022

Agency building custom mobile and web apps · 10 weeks

- › Built the interface and interactions of a mobile app.

JavaScript · HTML · CSS

SKILLS

Back-end	PHP, Laravel, Laravel Nova, REST APIs
Front-end	JavaScript, TypeScript, Vue.js, React, Next.js, Tailwind CSS
Data	MySQL, ClickHouse
DevOps	Docker, GitHub Actions, Linux, Git, Scaleway
Other	WordPress, WooCommerce, IoT (LoRa)

EDUCATION

Professional Bachelor's in Web Application Development (LP MI AW), work-study · Université Grenoble Alpes	2022 – 2023
DUT in Computer Science (2-year technical degree) · IUT2 Grenoble, Université Grenoble Alpes	2020 – 2022
Baccalauréat (French high-school diploma) · Lycée Paul Hérault, Saint-Jean-de-Maurienne	2020
